The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “the head harness” lacks antecedent basis. The claim is improper as it is merely functional and does not further limit any claimed element.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carella. Carella shows loops 20 and 26 and drag grip 28.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carella. To make the loops from a single length of strap by cutting both from a single length of strap would have been an obvious mechanical expediency.

Claims 1-8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hengstenberger in view of Anderson. Hengstenberger shows the claimed harness with the exception of having two complete loops for the arm portions of a user. Anderson in fig.6 shows a drag harness with two arm loops. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hengstenberger for his arm loop portion to comprise two loops, as taught by Anderson, to localize a dragging force around a user arm portions. Furthermore, to make the arm loops and drag loop of separate strapping would have been an obvious mechanical expediency by the use of separate strapping for the different portions.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hengstenberger and Anderson, as applied to claim 7 above, and further in view of Yocco. Yocco shows a drag harness made of a flame resistant material. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the harness of Hengstenberger to be made from flame-resistant material, as taught by Yocco, to enable its use during a fire rescue.
